**Letter to the Oklahoma City
Memorial Foundation**

April 14, 1997

Dear Friends:

Our nation will never forget that tragic day, almost two years ago, when we first learned of the bombing of the Alfred P. Murrah Federal Building in Oklahoma City, and we will always remember the courage shown by the citizens of your strong and united city during that dark time. All Americans continue to support your recovery efforts, and our prayers are with you.

With the destruction of the Murrah Federal Building, we learned once again that America is a family, and that such a brutal attack on any American is an attack on us all. In uniting around the citizens of Oklahoma City, our nation proved once again that no force of hatred or terrorism can ever defeat the American spirit.

I want to express my support for your efforts to establish a memorial on the site of the bombing. This memorial will be a fitting tribute not only to those who died, but also to those whose lives were changed forever on April 19, 1995. I know that, by honoring our fellow Americans in this way, we can help to further the healing and restore hope for a brighter, more secure future.

Hillary and I will always remember the time we spent with the families and survivors. Please know that we are keeping them, and all the people of Oklahoma City, in our thoughts and prayers.

Sincerely,

William J. Clinton

**Memorandum on Expanding Access
to Internet-based Educational
Resources for Children, Teachers,
and Parents**

April 18, 1997

*Memorandum for the Heads of Executive
Departments and Agencies*

*Subject: Expanding Access to Internet-based
Educational Resources for Children,
Teachers, and Parents*

My number one priority for the next 4 years is to make sure that all Americans have the best education in the world.

One of the goals of my Call to Action for American Education is to bring the power of the Information Age into all of our schools. This will require connecting every classroom and library to the Internet by the year 2000; making sure that every child has access to modern, multimedia computers; giving teachers the training they need to be as comfortable with the computer as they are with the chalkboard; and increasing the availability of high-quality educational content. When America meets the challenge of making every child technologically literate, children in rural towns, the suburbs, and inner city schools will have the same access to the same universe of knowledge.

I believe that Federal agencies can make a significant contribution to expanding this universe of knowledge. Some agencies have already launched a number of exciting projects in this area. The White House has a special "White House for Kids" home page with information on the history of the White House. NASA's K-12 initiative allows students to interact with astronauts and to share in the excitement of scientific pursuits such as the exploration of Mars and Jupiter and with experiments conducted on the Space Shuttle. The AskERIC service (Education Resources Information Center), supported by the Department of Education, has a vir-
